Connor's Corner

As I celebrate 18 years of remaining a proud Hosanna Community resident, I continue to thank God for allowing me to be a positive part of such a positively concerned setting. I am always eager to share moments learning the benefits of living independently. Appropriately, our residences are named: Faith and Hope. Interestingly, it's really difficult to have one without the other. Having a confident belief and trust in God allows one to rely on a wish with expectation of the fulfillment of His promise of eternal life. Admittedly, I am very pleased and find it necessary to share thanks for the abilities that God allows us to choose. I wish to stress one power granted by God that brings with it protection and also a true hint of excellence. Although sometimes explained as a "short prayer or blessing before or after a meal," understand that GRACE is not often described as a favor and honor, divine love, charm and beauty. All in all, I find that God's grace that permits us to believe and trust His love and eternal promises creates true faith. My hope is for all of us associated with Hosanna to remain in good graces with as many others as we can. We must do it with good grace. It's a choice I highly recommend.
