WHAT'S UP WITH EARTH DAY?!

Every day should be Earth Day, but there's one special day a year — April 22 — that we set aside as a reminder to take care of our planet. After all, it's the only one we have! Did you know that it took a river - the Cuyahoga River in Ohio - to actually catch on fire in 1969 to draw attention to the need to take care of the earth! The next year, 1970, was the first Earth Day. Almost 20 million people participated in events and rallies across the country. Today, Earth Day is celebrated by a billion people in more than 190 countries.
